Percentage : 68.8%

X (Secondary)

Year of Completion: 2012
CBSE Board (J.M. High School, Darbhanga, Bihar-847304)
Percentage : 65.4%

PROJECTS

Flight Ticket Booking System

April 2018 - May 2018

(JAVA+ORACLE)
Along with the basic features, a special UI was made for business class passengers to choose seats. Users were given a preview of price and seats before they confirmed booking. No flight in the takeoff list, if no passengers.

Iris Data Set Prediction

Nov 2018 - Dec 2018

(Python)
The world is going towards Artificial Intelligence. We are making machines learn from data rather than hard core programming which we used to do previously. Thus I am also gaining experience by working on real time datasets like Iris dataset which I have used in my project. By working on this project I have gained knowledge and insights about how to handle large datasets and make predictions on it.

Working on Live Projects with Indian Industries Association(IIA) (10 Members)

Jan 2019 – till date

Working as a Business Analytics for the growth of their Business, We try to Provide an Interface to grow their Business just like B2B portal.
